

MAYUR JONDHALE

AI/ML Engineer

07721840486 | mayurjondhale0111@gmail.com | United Kingdom | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with an MSc in Artificial Intelligence (Merit, Aston University) and a BSc in Computer Science. Hands-on experience building end-to-end machine learning and computer vision systems — from data preprocessing through model training, evaluation, and deployment — using Python, PyTorch/TensorFlow, and modern software engineering practices. Comfortable across the full stack, with additional experience in web development, relational databases, and workflow automation. Graduate visa (valid until February 2028) — full right to work in the UK; open to relocation and client-site work.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, SQL

AI / Machine Learning: PyTorch, TensorFlow, Scikit-learn, Computer Vision, Deep Learning, Model Evaluation

Web & Backend: HTML, CSS, Bootstrap, REST APIs

Databases: MySQL

Tools & Platforms: Git, GitHub, Linux, Windows, Jupyter

EXPERIENCE

Postgraduate Mentor — Aston University

Jun 2025 – Aug 2025

- Mentored incoming MSc Artificial Intelligence students through Aston University's Postgraduate Mentoring Scheme, helping them settle into postgraduate study
- Offered guidance on coursework planning, module selection, and navigating university systems, acting as a first point of contact for academic and practical questions

Freelance Web Developer — Self-Employed

Nov 2024 – Dec 2024

- Designed and built the responsive front end for an e-commerce clothing website for a client, using HTML, CSS, JavaScript, and Bootstrap
- Built the product browsing and checkout page layouts with an interactive UI, ensuring a responsive experience across browsers and devices
- Worked independently with the client, from gathering requirements through to a functional front-end prototype

Live site: mxyur1.github.io/Ecommerce-Clothing

PROJECTS

Deepfake Detection System (Audio & Video) — Individual Project

Jun 2025 – Sep 2025

- Built an end-to-end multimodal deep learning pipeline in Python/PyTorch to detect AI-generated and manipulated audio/video content, covering data preprocessing, model training, evaluation, and inference
- Achieved 0.93 ROC-AUC with a multimodal late-fusion model (ImageNet-pretrained ResNet-18 video branch and a custom CNN audio branch), improving on the 0.88 video-only baseline; evaluated on the VidTIMIT, DeepfakeTIMIT and DFDC datasets using rigorous subject-disjoint splits
- Documented full architecture, experiment results, and deployment workflow for reproducibility

GitHub: github.com/mxyur1/Deepfake-Detection-using-AI-for-Audio-and-Video

Automated Student Result Monitoring System — Academic Project

Apr 2023 – Jul 2023

- Designed and built a database-driven application automating academic result calculation, monitoring, and reporting, using PHP, MySQL, HTML and JavaScript
- Implemented validation logic to catch data-entry errors and ensure accurate, consistent result calculation
- Delivered the application end-to-end as part of a three-person team, from requirements gathering through deployment

GitHub: github.com/mxyur1/Student-Result-Monitoring

Additional Project — Amazon UI Clone: frontend replica built to practice component-based design, responsive layouts, and cross-browser testing. [GitHub](#)

EDUCATION

Aston University — MSc Artificial Intelligence (Merit)

Sept 2024 – Jan 2026

MIT Arts, Commerce & Science College, India — BSc Computer Science *Sept 2020 – Jun 2023*
CGPA: 8.4 / 10

CERTIFICATIONS

- NVIDIA — Certificate of Competency: Getting Started with Deep Learning (Jul 2025)
- Teknowell EduTech — Full Stack Java Developer (2023)
